

Didactic: Primary Care Psychiatry - Overview of Assessment and Treatment; Introduction to Registry Use

To-Do Date: Sep 22 at 11:59pm

Ramanpreet Toor, MD

rtoor@uw.edu

I work as a psychiatric consultant in two primary care clinics following the Collaborative Care Model. I am also the associate director of the Integrated Care Training Program and lead faculty for online didactics of the Community-Based Fellowship.

Overview

View [Dr. Toor's Introduction](#) video (1 minute)

Learning Objectives

By the end of this didactic session, participants will be able to:

1. Be clear about the psychiatric consultant's role in the Collaborative Care Model (CoCM)
2. Describe different types of consultations in CoCM
3. Be familiar with structured way to gather information from care manager
4. Understand how the assessment and the treatment recommendations are different in CoCM
5. Describe what is a registry and how to structure weekly meeting with the care manager in CoCM

Activities

1: Case Review Questions

Overview: Give a quick snapshot of your comfort level with diagnosis and treatment recommendations.

[Read and respond to the case here.](#)

2: Explore Assessment and Treatment

Overview: In the following three videos, learn how assessment and treatment are different in the Collaborative Care Model (CoCM).

View: [The Collaborative Care team and the role of the psychiatric consultant](#) (9 minutes)

View: [Consultation and assessment in the CoCM](#) (18 minutes)

View: [Treatment in the CoCM](#) (12 minutes)

3: Write a Case Review

Overview: Submit a case review for the case you read in Activity #1, using a specific case review template. Dr. Toor will share her case review note on this patient once she receives your assignment.

[Click here to post](#)

4. Registry Activity

Overview: Watch the following video, read the papers, and respond to the discussion board.

View: [Systematic Case Review Using the Registry](#) (20 minutes)

Read: [Best Practices for Systematic Case Review in Collaborative Care](#) ↓, and [Best Caseload Review Practices Supplement](#) ↓

Discussion prompt: Look over the [registry activity table](#) ↓. Select and write about four patients you would like to discuss with your care manager from the registry activity table and explain why.

[Submit your response here.](#)

5: Attend the Meeting with Faculty and Peers

You will have a chance to discuss this content with Ramanpreet Toor, MD and your peers by attending the recommended [Zoom](#) meeting on Monday, September 27 from 4:00 - 5:00 pm. This is required for UW Fellows and recommended for Community Based Fellows.
