

# Community-Based Integrated Care Fellowship

The University of Washington Community-Based Integrated Care Fellowship welcomes psychiatric providers seeking additional training to deliver integrated care in community-based settings. This CME-accredited program\* is offered through the UW Integrated Care Training Program (ICTP) and is free for Washington State providers.

This is a ten-month, employment-friendly fellowship which is modeled after employed MBA programs. It offers a comprehensive curriculum, with an emphasis on core Collaborative Care skills, telepsychiatry, establishing an integrated care practice, delivering care for special populations, and learning the ins and outs of billing/payment codes.

Trainees can expect:

- A flexibly scheduled four-hour weekly commitment
- Online distance-learning component
- Quarterly in-person sessions for specialized skills work
- Monthly mentorship with a UW ICTP faculty member
- A focus on quality improvement

\*Please see back of flyer for CME information.

## REQUIREMENTS

- Active medical license
- Current practice
- Letter of support from current employer, if employed
- Brief personal statement
- Current CV

**WHO:** Psychiatric providers, such as psychiatrists, psychiatric nurse practitioners, and psychiatric physician assistants

**WHEN:** September 2023 – June 2024

**COST:** Free for WA state providers through the UW Integrated Care Training Program. \$20,000 for providers outside of Washington State.

**APPLY:** Visit [ictp.uw.edu/apply](https://ictp.uw.edu/apply)

- Deadline to apply is **June 5, 2023**
- Questions? Email [uwictp@uw.edu](mailto:uwictp@uw.edu) or scan:

## Objectives

Upon completion of this activity, participants will be able to:

1. Demonstrate the core skills of a psychiatric consultant as part of a Collaborative Care team.
2. Plan and execute a quality improvement project to apply Collaborative Care principles in current practice setting.
3. Describe the core features of implementation of an integrated care program to deliver mental health services in a primary care setting, including developing new workflows.
4. Articulate the rationale (including citing evidence from the literature) and business case for developing integrated care practices to leverage scarce psychiatric services.
5. Advocate for effective integrated care practices and educate interdisciplinary team members.
6. Describe both direct and Collaborative Care psychiatric services through a telemedicine approach.
7. Promote personal and organizational well-being and resilience through a commitment to continuing education, participation in professional networks, and practice improvement.

## The Community-Based Integrated Care Fellowship will address the following topics:

Primary Care Psychiatry	Substance Use
Brief Behavioral Interventions	Child Populations
Telepsychiatry	Maternal Populations
Transition to Practice	Geriatric Populations
Implementation	Public Health & Health Services
Quality Improvement	Primary Care in Mental Health Settings
Financing Collaborative Care
