

UW Psychiatry & Behavioral Sciences

## **Implementing Integrated Care:** How do I help my organization build and sustain a successful program?

Debra Morrison, Project Manager/Practice Coach AIMS Center

04/27/2021

## **Speaker Disclosures**

 Debra Morrison has no relevant conflicts of interest to disclose

## **Learning Objectives**

- Describe the roles of the Implementation Team and the CoCM Clinical Team
- Recognize the elements of a strong implementation effort
- Identify the crucial roles for a Psychiatric Consultant in program success

### **Important Context**

- Starting something big or making a big change COSTS:
  - Staff Time
  - Staff Effort and Energy
  - Money
- Most practices are short of all these
- Is the future "pay off" worth the investment?

Integrated Care Training Program

## **Two Critical Teams**

Clinic
Implementatio
n Team

Clinical Care Team

Integrated Care Training Program

## **Clinic Implementation Team**

- Leadership responsibility CIT Lead and PCP Champion
- Addresses obstacles and moves implementation forward
- Engages stakeholders in creating Shared Vision
- Allocates time and space for training, planning and assessment
- Hires key new staff BHCM and PC
- Accountable for Program Metrics and CQI efforts

Integrated Care Training Program

## **Shared Vision and Goals**

- Compelling Reason for Change
- Picture of Improved Future
- Motivates for the Challenges Ahead
- Easily Communicated
- Process is as important as the Product

Integrated Care Training Program

## **Meaningful Program Metrics**

- How will we know this change is an improvement?
- Feasible ways to measure impact at various levels across time
  - Community/Population
  - Clinic
  - Caseload
  - Patient

Integrated Care Training Program

### Integrated Care Training Program

## **Milestones Checklist**

- Key infrastructure in place
  - -Leadership support
  - -EHR
  - Registry
  - -Billing capacity
  - -Key positions hired and trained
  - Detailed workflows for identification and treatment

#### Milestone Checklist - Behavioral Health Integration in Primary Care

Instructions: Use the below checklist to track on implementation progress during Site Implementation Team meetings until all items are completed.

-					
n	-	÷.		٠	
-	a	•	=	٠	

Clinic Name:

Milestone	Status	Notes
Investment and encodered comparts of law content and enclose	Not yet started	
Involvement and organized support of key senior leadership and clinic leadership.	In progress	
and clinic leadership.	Completed	
	■Not yet started	
Primary care champion is identified.	In progress	
	Completed	
PCPs and other medical providers are well informed and involved in integration plans.	Not yet started	
	In progress	
	Completed	
A behavioral health care manager has been identified and hired or under contract.	□Not yet started	
	In progress	
	Completed	
	■Not yet started	
A behavioral health provider has a designated space to	In progress	
meet with patients in the primary care clinic.	Completed	
A psychiatric consultant has been identified and hired or under contract.	□Not yet started	
	In progress	
	Completed	
A registry tool has been identified to use for the integrated	Not yet started	
care program to track patients, and is available to the team for	In progress	
training purposes and patient entry.	Completed	

### Integrated Care Training Program

Milestone	Status	Notes
The psychiatric consultant has access to the EHR and registry.	Not yet started	
	In progress	
	Completed	
EHR templates have been developed for the behavioral health	Not yet started	
provider and psychiatric consultant to use so that the primary	In progress	
care team has access to these records.	Completed	
Program lead(s) and/or behavioral health supervisor(s) have	Not yet started	
the time and resources to adequately support practice change	In progress	
and implementation.	Completed	
The clinic has a reliable, well-tested workflow in place for	Not yet started	
behavioral health screening using the PHQ. The workflow is	In progress	
described in writing or a diagram and reflected in clinic protocols and staff training materials.	Completed	
· · · · · · · · · · · · · · · · · · ·	Not yet started	
Workflow documents for subsequent phases of BH clinical care are being developed with the appropriate input from	In progress	
operations and clinical staff.		
	Not yet started	
A protocol and plan are in place to manage a patient who is at risk of suicide. All clinical staff have had training on it and the protocol is readily accessible when needed.	In progress	
Process and outcome measures have been identified to track	Not yet started	
program progress and identify areas for improvement. These	In progress	
might include access, patient outcome, utilization, screening,	Completed	
staff or patient experience measures.		
Leadership has a preliminary plan in place to finance and	Not yet started	
sustain your model over time, including plans to generate	In progress	
revenue to support integrated staffing resources.	Completed	

### Integrated Care Training Program

## **Clinical Care Team**

- Leadership PCP Champion, BHCM, PC
- Addresses patient challenges and moves treatment forward
- Engages colleagues in implementing Shared Vision
- Makes time for team reflection and "tuneup"
- Is accountable for ongoing CQI efforts

Integrated Care Training Program

## **Training Clinical and Support roles**

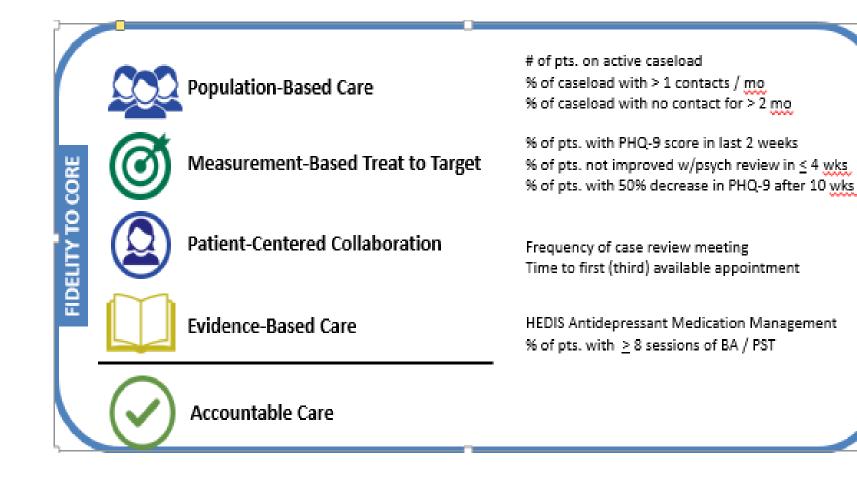

- Understanding CoCM model
- Screening
- Crisis protocols

BH staff and PCPs

- Assessment
- Brief Behavioral Interventions
- Medication treatment
- Relapse Prevention Planning
- Discharge to usual or specialty care

Integrated Care Training Program

## **Accountability for Caseload**

### Integrated Care Training Program

### Sustainment Define Value of BH Integration Broadly

**Integrated Care Training Program** 

## **Takeaways**

- Thorough planning is worth the time and effort
- At least two critical TEAMS contribute to implementation success
- Implementation and sustainment are both ongoing processes of CQI
- Psychiatric providers can play a crucial role in success

# Peer Learning: Stages of Change

#### 6. Recurrence

Definition: Experienced a recurrence of the symptoms.

Primary Task: Cope with consequences and determine what to do next

#### 5. Maintenance

Definition: Has achieved the goals and is working to maintain change.

> Primary Task: Develop new skills for maintaining recovery

#### 1. Precontemplation

Definition: Not yet considering change or is unwilling or unable to change.

> Primary Task: Raising Awareness

### **Stages of Change**

#### <u>4. Action</u> Definition: Taking steps toward change but hasn't stabilized in the process.

Primary Task: Help implement change strategies and learn to eliminate potential relapses

#### 2. Contemplation

Definition: Sees the possibility of change but is ambivalent and uncertain.

> Primary Task: Resolving ambivalence/ Helping to choose change

#### 3. Determination

Definition: Committed to changing. Still considering what to do.

Primary Task: Help identify appropriate change strategies
